

# Inclusive Food Value Chains

Clemens M. Grünbühel

# Inclusive food value chains

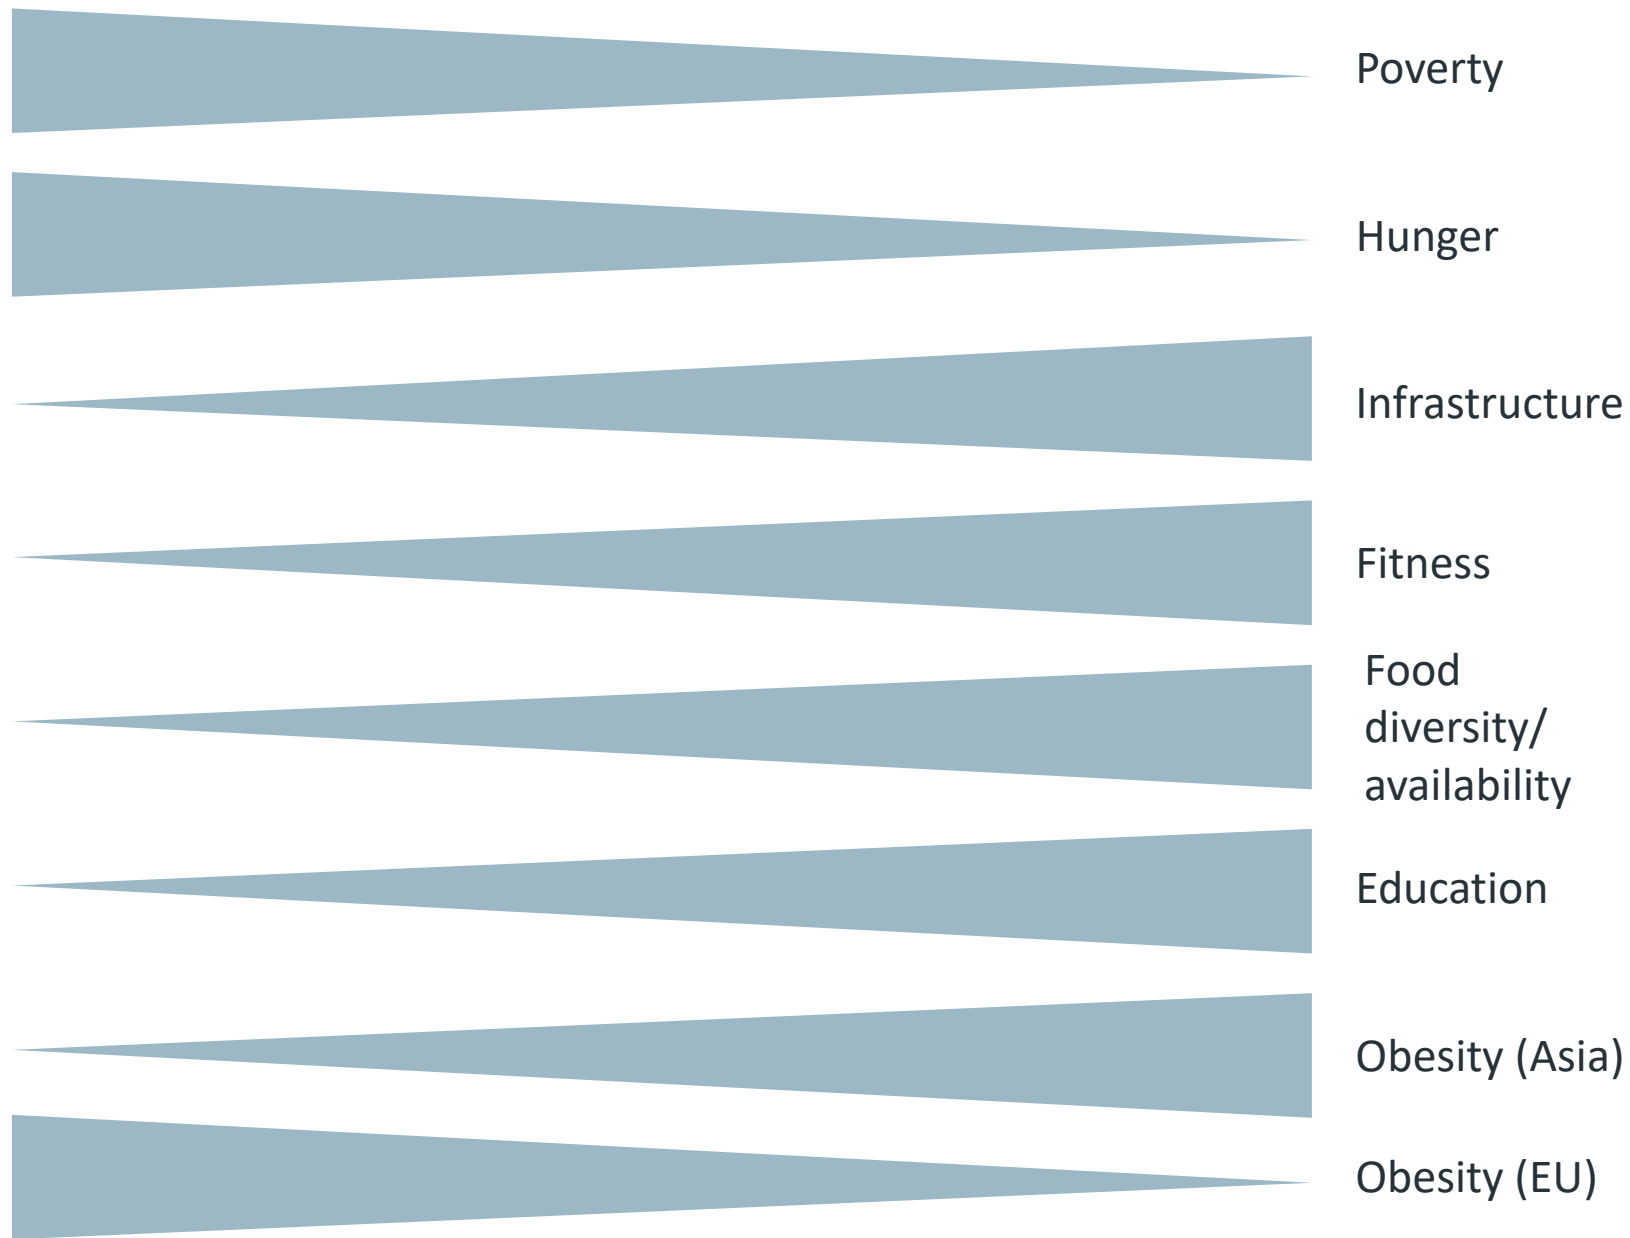

---

- ✓ Co-benefits
  - ✓ Investments into rural areas
  - ✓ Creating future farmers
  - ✓ Creating wardens for ecosystem services
  - ✓ Creates livable rural areas
  - ✓ Transparency & accountability
- Rural areas as food source
  - Rural areas as labour source
  - Bias towards urban consumers
  - Food as climate liability

**Rural**

**Peri-urban**

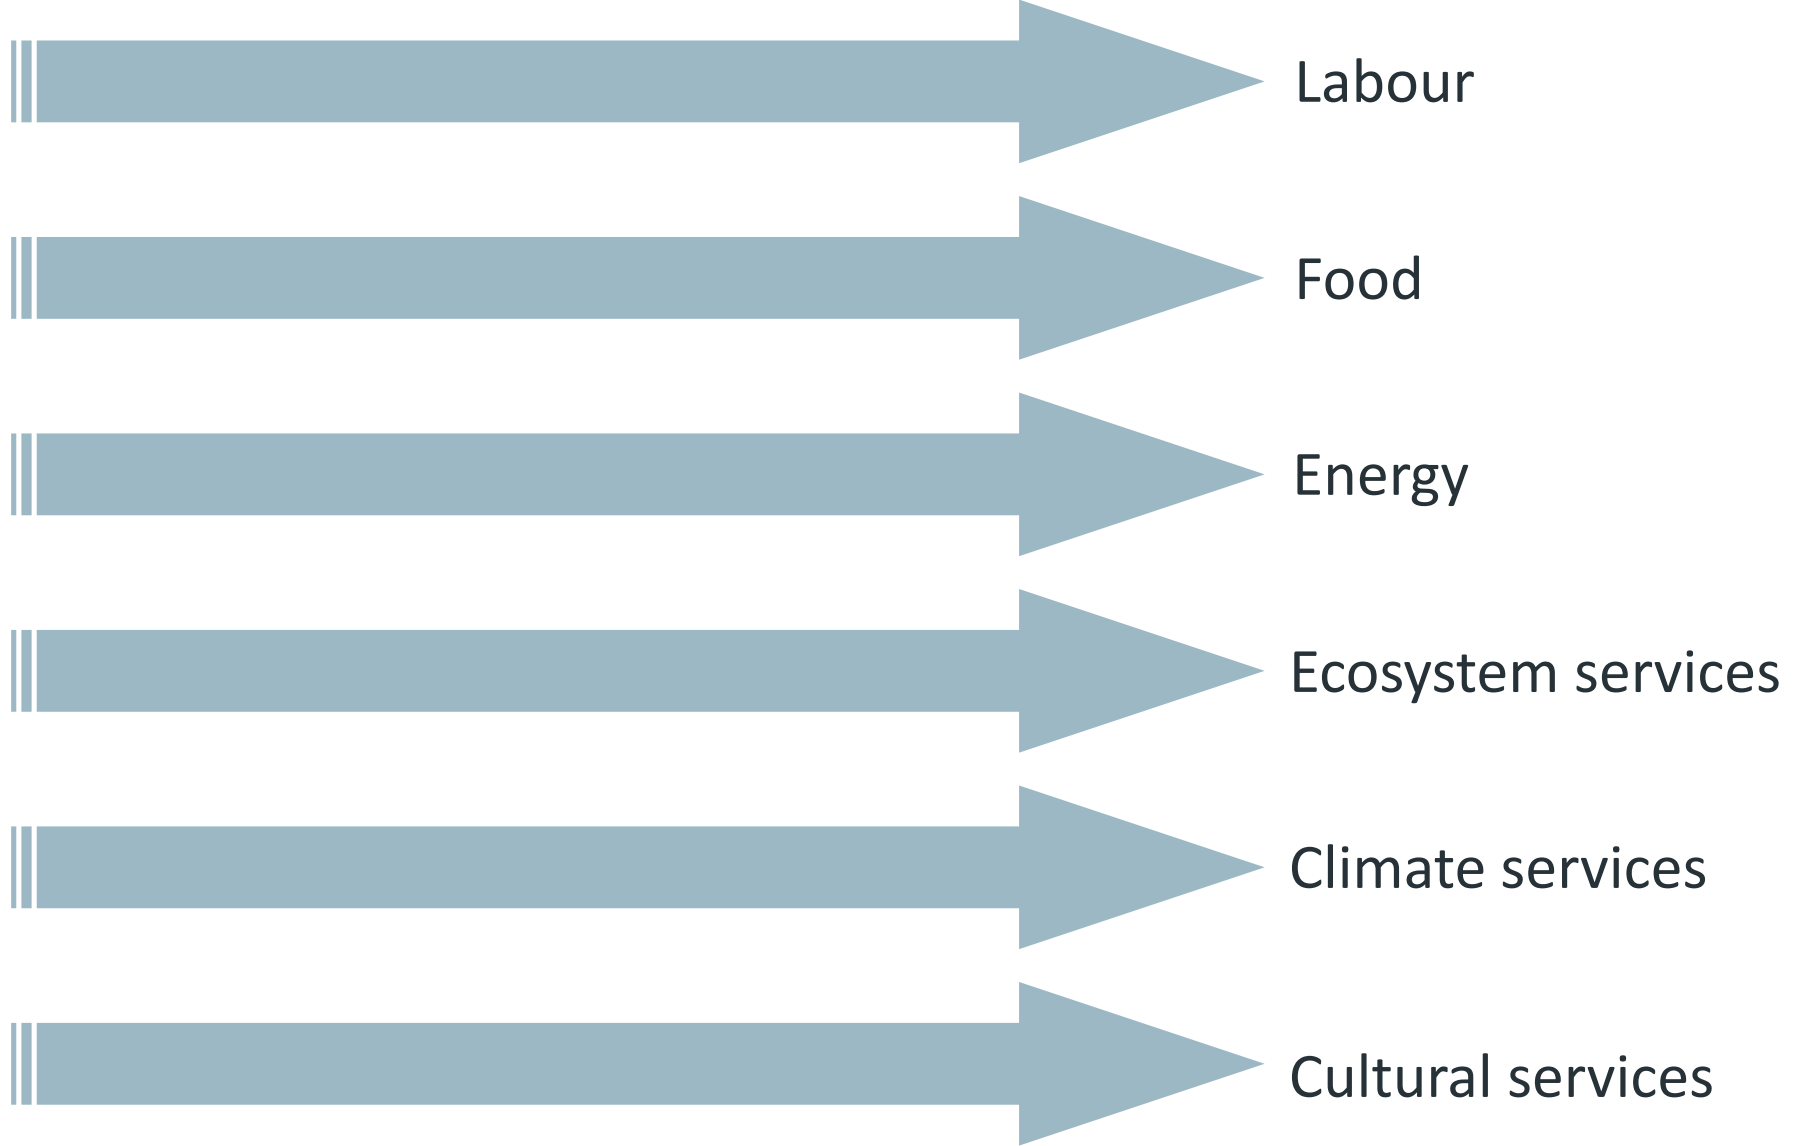

**Urban**

**Rural**

**Urban**

# Some ideas for SDG 12

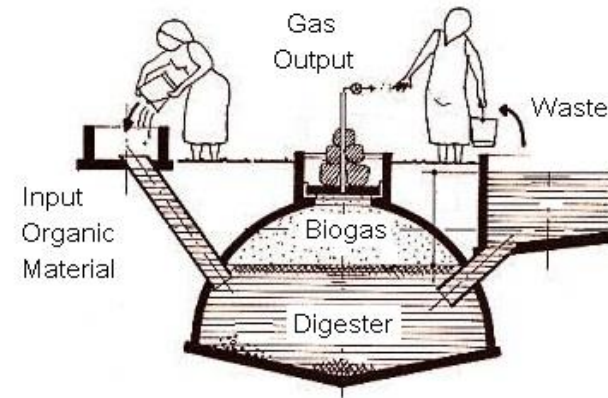

---

- Post-harvest and processing food loss
- Food waste
- Better use of existing farmland
- Circular energy farms
- Circular nutrients farms
- Farms are managed ecosystems in cultural landscapes
- Farmers are environmental managers

# What are smart rural futures?

---

...co-generated visions for development, that put the interests and aspirations of the people living there at the centre. These visions are based on scientific evidence and an improved understanding of drivers of change in socio-ecological systems.

## Smart Rural Futures support

- Healthy environments to fight against poverty and climate change
- Ensure biological and cultural diversity
- Promote responsible business investments supported by new policy approaches towards just and balanced sustainable ecosystem for all.
